

SCA Technologies

Intelligent Cost Management Solutions

SCAnalyzer™ Module

In order to manage your sourcing cost well, you need to have the ability to plan and review your variances. SCA Technologies' **SCAnalyzer™ Module**, our web-based decision support tool, provides a common sense approach to sourcing. It helps you to drive planning, measure actuals and develop timely responses so you can maximize revenue by catching variances – before they happen.

SCAnalyzer™ Module allows you to collaboratively plan future cost budgets, targets and forecasts into one unified organizational view. And you can more effectively manage your sourcing cost variances and make better sourcing decisions.

“SCA Technologies provides a giant supply chain model that measures cost, cycle-time and flexibility. It has a powerful, built-in optimizer that reveals the ramifications of every change you make to the system. Not only does this improve your ability to make better decisions, it helps you plan and prepare for the uncertainties in your business.”

Sunder Kekre
Professor of Operations Management
Carnegie Mellon University

SCAnalyzer™ Module At-a-Glance

- Shows variances allowing you to respond early on.
- Removes guesswork with visibility into the budgeting process — assumptions, associated documents, comments and revisions.
- Automates procedures for budget creation, data collection, revisions, comments and reviews.
- Streamlines process activities — central processing of budget and allows simultaneous multiple inputs and uploads with status updates.
- Compares actuals to budget for budget segments.

SCAnalyzer™ Module Will Enable You to Answer the Following:

- Can I monitor and track integrated performance for:
 - Cost (summary and line item details)
 - Commodities
 - Capacity
 - Operations (volumes, shifts)
- What does my historical, current and forward looking information look like?
- How will I get all parties involved in the budgeting process to view the same information and work from the same assumptions?
- How can I track and monitor my cost improvement strategies and KPIs?

Solution Implementation Requirements

- Integrates with your your current system.
- Follows ISO 17799 standards for security management.
- 256 bit SSL data encryption.
